Angler profile information from CHTS (for fishing effort)

You never sell any of your catch (**pure recreational**)

You sometimes sell fish to help cover fishing expenses

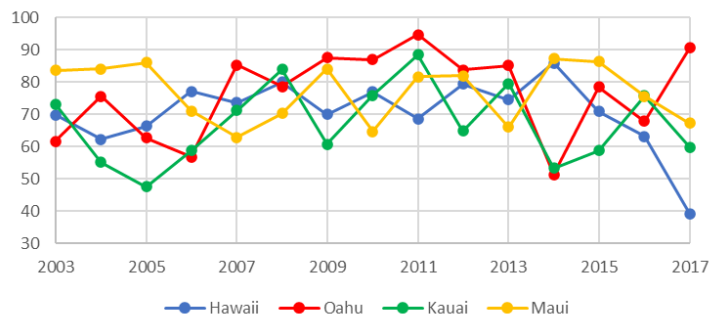

You sell fish for profit to pay your living expenses

NOAA
FISHERIES

Fishing effort adjustment for pure recreational fishing

Percent of pure recreational fishing trips by county (Pi)

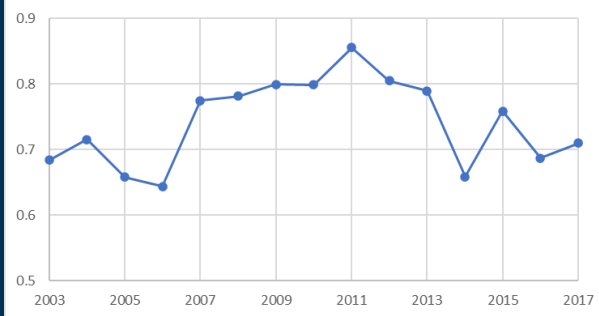

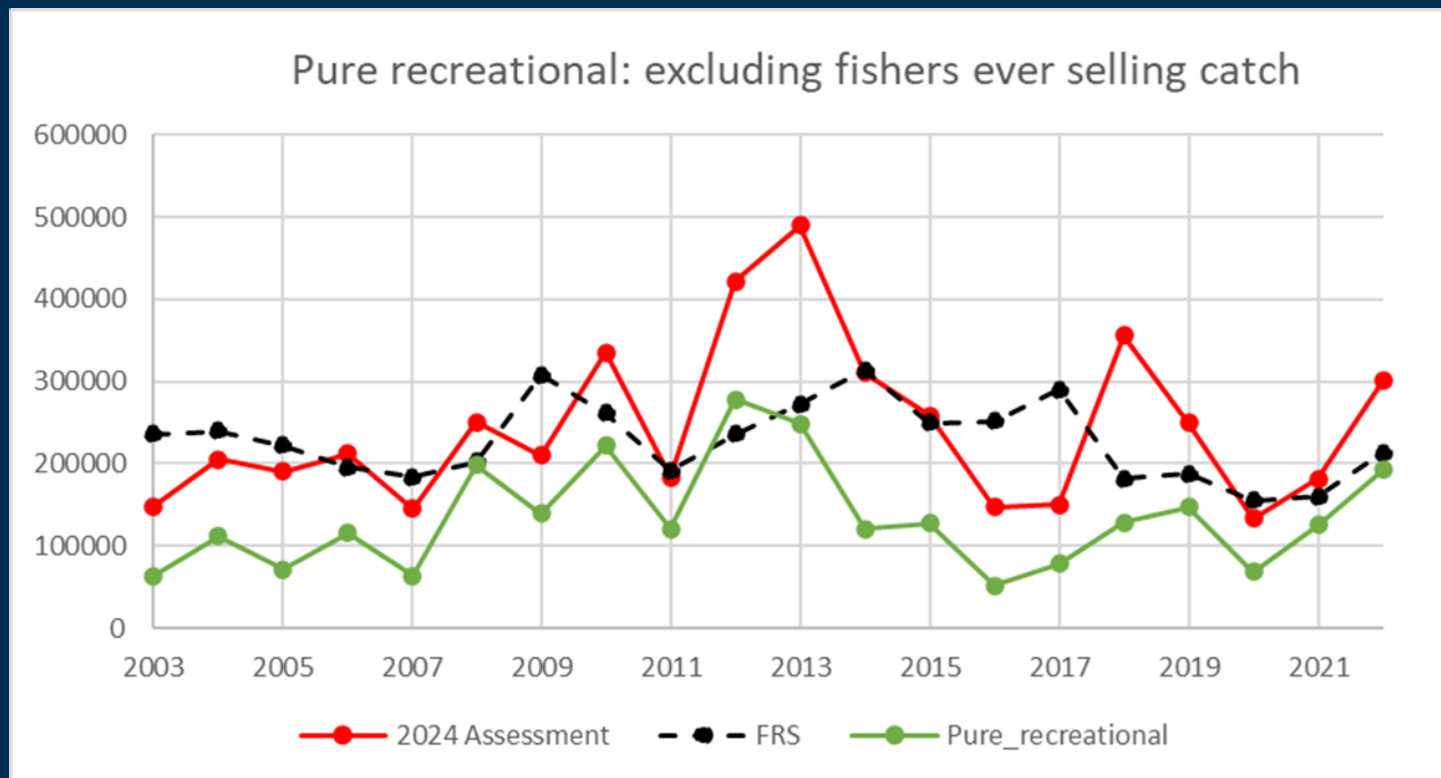

Proportion of fishing trips from each county (Ti)

$$\sum_{n=1}^4 (P_i * T_i)$$

Adjustment

Survey catch from potential CML holders was excluded for catch rate estimation (unsold catch only) and fishing effort was adjusted for pure recreational fishing trips

Outline

1. Non-commercial catch estimation for Deep7 bottomfish and Hawaii Marine Recreational Fishing Survey (HMRFS)
2. Catch rate estimation for pure recreational fishers
3. Fishing effort adjustment
- 4. Summary and conclusion**

NOAA
FISHERIES

Summary and conclusion

The fishing trips from pure recreational fishers accounted for ~75% of the estimated fishing effort from CHTS/FES

The estimated catch from pure recreational fishers was ~55% of the non-commercial catch previously estimated

Separate catch rate and fishing effort estimation by fishing method (bottom fishing vs other methods) or by county may be explored in the future to further improve the catch estimation for Deep7 bottomfish
